

英文名称: Prestained Protein Molecular weight Mark

分子量范围: 19000-119000

级别: BR

规格: 2×0.25ml

产品描述: A mixture of purified protein covalently coupled to a blue chromophore. The protein concentrations are optimized to yield 6 blue bands after SDS-PAGE electrophoresis, the marker is supplied pre-diluted with gel loading buffer for direct loading onto an SDS-PAGE gel. Sufficient for 100 mini gel applications (5ul/well) or 50 large gel applications (10ul/well)

在电泳凝胶上呈现6条带: 19kDa, 24 kDa, 31kDa, 46kDa, 79kDa, 119 kDa

Storage Buffer: 62.5mM Tris-HCl (pH7.5 at 25°C), 1mM EDTA, 2% SDS, 10mM DTT, 1.5mM Na₃N and 33% glycerol.

性状(以下信息仅供参考): 液体

用途: 本品仅供科研, 不得用于其它用途。(以下用途仅供参考)用来测定蛋白质的分子量

保存: -20°C
